

## Paradental® herbal gingival solution

### Activity:

Paradental® is gingival herbal solution which active ingredients are vinegar extract of onion, nettle and marigold and peppermint oil for treatment of different inflammatory diseases of gingival and oromucosal cavity.

Peppermint oil applied on the mucous gives sensate of cooling, with weak anesthetic activity and pleasant odor, which are based on the menthol present.

Onions have a wide area of pharmacodynamic action which are based on the present of nonglycoside sulfur compounds (alliin, alicin), especially antimicrobial (antibacterial, antiviral, antifungal) and antiinflammatory action.

On the other side the nettle and marigold with their antimicrobial, hemostatic, angiogenic, adhesive and stimulatory action on the tissue granulation, enlarge the effect of the other Paradental compound and also stimulate physiological regeneration and epithelization of the damage tissue.

### USE

Paradental® herbal gingival solution is used for treatment of paradentose, chronic gingivitis, paradental abscesses, post extraction wounds and other inflammatory gingival diseases.

### WAY OF USE

Paradental® herbal gingival solution is assigned for local application on the gingival and oromucosal mucous. It can be used with application on the compresses, which are applied on the inflamed gingival or for gargle.

- **Application on the compresses:** wet sterile compress with Paradental® herbal gingival solution on the inflamed gingival and left for 10-30 min, two to three times a day.

- **Gargle:** 5-ml (one-teaspoon) Paradental® herbal gingival solution gargle 1-2 minutes, 2-3 times a day.
